Vaccine Storage	Temperature L	.og (Fahrenheit)
------------------------	----------------------	------------------

- Providers are required to have protocols for reviewing and recording min/max temperature reading at the beginning of each work day.
- Complete this log by marking the:
 - ✓ Time of day the temperatures were checked.
 - ✓ Initials of the staff person recording the temperature.
 - ✓ An "X" in the box that corresponds with the current temperature/time of day.
- If the temperature is in the too warm or too cold row, write the actual temperature in the box; do not use an X.

- VFC PIN: Month/Year:
- Fill in the minimum and maximum temperatures in the morning (if you have that information).
- Take immediate action on any temperature you find in the shaded area!
- If the temperature in your refrigerator/freezer is not on the grid or is in a shaded area, mark the vaccine in question and do not use it until you've called the Georgia Immunization Program, 800-848-3868 or 404-657-5013.
- If the vaccine has gotten too warm or too cold, you will not be able to distinguish viable from nonviable vaccine by looking at it.
- Keep these monthly temperature logs for three years.
